FAQs: You Have Questions, We Have Answers

Where does my health information in the Patient Portal come from?

All of the information in the Patient Portal comes from your Newman Regional Health and Newman Regional Health Medical Partners Electronic Health Records. This ensures that you have access to the most accurate, up-to-date information possible.

How do I obtain access to the Patient Portal?

Patients can start the enrollment process by providing an email during registration or enroll prior to discharge. Patients can also self-enroll by visiting www.newmanrh.org, clicking on the 'My Health Records' button, and Login Here. Simply enter your username and password or follow the instructions using the 'Sign up' link at the bottom of the login screen. Self-enrollment must be completed on a laptop or desktop computer.

Can I allow others to access my medical records via the Patient Portal?

My Health Info also provides a convenient 'Shared Access' feature which allows portal users the ability to invite others to view their electronic medical records. This tool can easily be enabled once logged on to a user's portal account.

Is my information safe?

Yes. Patient Portal passwords are encrypted and URLs are re-written so that they cannot be copied and pasted. You and any others you have invited through the 'Shared Access' feature are the only ones who can access your Patient Portal. Also, a timeout feature protects your information if you leave the Patient Portal page open.
