MEDICAL PARTNERS

Simply the Best Care

Newman Regional Health Medical Partners is dedicated to providing patients with the highest level of collaborative care for the Emporia community and surrounding areas. By merging high technology tools and personalized attention, we do our best to optimize health care needs. We achieve this goal by listening to questions and concerns, and educating patients on how to promote a healthy lifestyle for the entire family.

We treat a wide variety of illnesses, injuries, and conditions in children and adults of all ages, from infants and adolescents to adults and seniors. Our number one goal is to help patients feel better when they are sick and maintain good health in between visits.

The doctors and advanced practice providers at Newman Regional Health Medical Partners provide complete individualized medical care for everyone in the family, offering a range of preventive, urgent and chronic care services, as well as surgical, orthopedic and cardiology services. We provide high quality care that is patient-directed to meet individualized health goals while keeping the overall well-being of our patients in mind.

What to Expect

When arriving at the clinic, there will be a registration process for every patient. Please make sure to bring driver's license, insurance card, medications, and co-payment. For all first time patients there is mandatory paperwork that needs to be completed upon arrival.

The first step in each patient's visit is to review main concerns and reason for the appointment. The nurse will be recording the information to stay current with the patient's medical record. The provider will then come in to do an examination on the patient and make referrals and/or recommendations.

My Health Info Patient Portal

With Patient Portal access, patients can view upcoming appointments, send messages, make payments, and view summaries of their office visits, lab results, medication list, immunizations, and vitals. Patients can also print these records from their portal, if needed. If patients would like to register for a portal account, please visit:
